Arbitration: The two deals in arbitration have been consolidated into a single matter

Since the NIL Go platform launched on June 11, 2025, and through June 30, 2026:

- Since launch, the CSC has made a final determination on an average of more than 90 NIL deals per day.
- 41% of deals submitted to NIL Go were resolved within 24 hours. The significant increase in Associated deal volume since January has led to a decrease in the percentage of deals resolved within 24 hours of submission, since Associated deals require additional review.
- 63% of deals reached resolution within seven days following completion of all information fields in NIL Go. In many of the remaining 37% of deals, the CSC has sought additional information from the student-athlete, deal sponsor, or institution via communication outside of the software platform to make a determination on the deal. The CSC is often able to make determinations on these deals within seven days of receiving such additional information, but NIL Go currently does not allow us to readily calculate this percentage. The CSC has made updates to the platform allowing for most such communication to occur within NIL Go and is working to automate calculation of those percentages going forward.
