

NeoVent

AIM Tech

PHOENIX
Phoenix Medical Systems (P) Ltd.

NeoVent is a non- electric and cost- effective, simple and a safe ventilation support for the infants, delivers bi-level positive airway pressure (BPAP) to spontaneously breathing infants up to weights of 10 kg who require respiratory support due to conditions such as Respiratory Distress Syndrome or other conditions where BPAP is prescribed by a physician

Features and Benefits

Non-Invasive

Lower risk of chronic lung disease and infection in comparison with invasive options

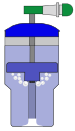

Non-electric

Does not require continuous electricity and can be used in remote centers

Reduced work of breathing

Uninterrupted breathing cycles delivered along with CPAP to provide comfortable breathing support

Intuitive User Interface

Easy & intuitive setup with a transparent design so users can see and understand NeoVent function

Safe and Effective

Effectively delivers the prescribed pressures. Multiple safety valves prevent the delivery of excess pressure

Universal Circuits

Compatible with standard respiratory circuits available in the market.

Cost-Effective

Delivers dual pressure ventilation at a much affordable price.

Low Noise Level

Provides a calm and undisturbed environment for the neonate while delivering safe ventilation.

High Frequency Oscillation

Combines the proven benefits of high frequency oscillation with dual pressure ventilation

Gentle

Specifically designed to meet the needs of infants without rupturing their little lungs

ACCESSORIES

STANDARD	PART NUMBER	STANDARD	PART NUMBER
Neovent Bubbler	AIH-100182	Washer	SHM-100230
Float	AFB-100089	T-connector	MEH-100144
Central Pipe Assy	AFB-100088	PIP Setting Valve	MEH-100145
