

Avyance modernizes operations, strengthens data-driven decision-making, and improves the way organizations work. We connect people, processes, and technologies with efficient and resilient systems, to address the operational, financial, and technical challenges.

Our expertise includes process automation, analytics, organizational change management, AI enablement, business process reengineering, and training. We build secure, compliant tools to streamline workflows, improve transparency, and boost productivity.

CORE COMPETENCIES

Digital and Data Modernization

- System Adoption
- AI Enabled Automation
- Cloud Migration & System Integration
- Data Visualization & Dashboard Deployment

Program Management

- PMO Stand Up & Implementation
- Workflow & Workforce Analysis
- Risk Monitoring & Mitigation
- Metrics & Performance Monitoring

Mission Support

- Mission Support Operations
- Strategic Planning & Reporting
- Business Process Analysis & Reengineering
- Financial Analysis & Capital Investment Planning

Organizational Change Management (OCM)

- User Enablement & Training
- Instructional Design & Leadership Development
- Strategic Communications & Marketing
- Graphic Design & Web Development

FEDERAL CONTRACTOR IDENTIFIERS

THE AVYANCE ADVANTAGE

- 8(a) Sole Source Eligibility: rapid award authority for federal agencies under FAR, DFAR, AMS
- Awards: MarCom Gold Strategic Plan, Hermes Gold Marketing & Platinum Training Catalog
- DCAA compliant accounting, ISO-aligned quality, CMMC Level 1 standard practices
- Recognized Employer of Choice: Inc. 5000 Best Workplace

PAST PERFORMANCE

Data Driven Workforce Planning

Avyance developed a strategic staffing optimization plan to help FAA Airports directorate assess its workforce and align resources with mission needs. Using data-driven analysis, targeted stakeholder engagement, and process improvements, we optimized organizational structure and workload distribution, and enhanced training and knowledge management across the organization. The result: streamlined operations, reduced costs, and the elimination of key inefficiencies. Employees can now focus on mission-critical safety activities, and leadership has a clear framework for decision-making, resource allocation, and workforce development, positioning the FAA Airports to meet future challenges with confidence.

Streamlining Operations through System Modernization

Avyance supported the National Gallery of Art's transition from a legacy financial management system to Oracle's cloud-based platform, marking the first federal deployment of this system. Through targeted training, tailored communications, and focused stakeholder engagement, we equipped more than 250 employees with the skills to confidently use the new system. Leadership secured strong workforce buy-in, user adoption exceeded expectations, and staff successfully embraced the modernized platform – advancing the museum's financial clarity, agility, and operational efficiency.

Optimizing Workflows through Process Automation

Avyance provided process automation and staffing optimization support to help FAA streamline operations and increase efficiency across its research and development portfolio. By analyzing workflows and automating processes, we improved resource allocation and reduced operational burdens. Our performance-tracking approach gave leadership real-time visibility into staffing needs and emerging trends, enabling faster, data-driven decisions. As a result, employees refocused on mission-critical work, and the organization operated with greater agility, precision, and overall effectiveness.
